Data presented on the State Cancer Profiles Web Site may differ from statistics reported by the State Cancer Registries (for more information).

<sup>†</sup> Incidence rates (cases per 100,000 population per year) are age-adjusted to the 2000 US standard population (19 age groups: <1, 1-4, 5-9, ..., 80-84, 85+). Rates are for invasive cancer only (except for bladder which is invasive and in situ) or unless otherwise specified. Rates calculated using SEER\*Stat. Population counts for denominators are based on Census populations as modified by NCI. The US populations included with the data release have been adjusted for the population shifts due to hurricanes Katrina and Rita for 62 counties and parishes in Alabama, Mississippi, Louisiana, and Texas. The 1969-2007 US Population Data File is used with SEER November 2009 data. The 1969-2006 US Population Data File is used with NPCR data November 2008/January 2009 data.
